

M47 Inner Seat — framework overview: the gateway to the web (v1)

Date: 2026-09-30 · **Author:** Claude Code · **Status:** for researcher review. Nothing written to the DB.

Asked for (researcher, verbatim): "the next phase is to distill M47 into a narrative and to use it as the springboard for the next investigation ... provide a high level overview of the findings in this folder to provide a framework for looking into the inner being seat that can serve as the gateway to add the detail findings in the next row."

What this is: a high-level map of what the M47 folder found, arranged as a frame that later strands can hang their detail on. It is **[Claude reading] throughout**, a distillation of the files listed in §9. It is not prose for the prose store; that stays the researcher's (#1900).

What it is not: a new reading. No verse was re-read for this document. Every point comes from a file in this folder, and the pointer (file § number) says where the verses are.

Method context: fan-out / progressive-stream analysis (#1900, 2026-09-30). The inner being is a web; M47 is the starting strand. Cluster codes are anchors, not goals.

1. The arc of the M47 work (what was done, in order)

#	Step	What it produced	File
1	Stock-take	38 Strong's codes, 2,688 verses; the six word families; sense splits (soul → life / self / person / appetite; spirit → wind / breath / temper)	M47-inner-seat-stocktake-v2
2	Depiction	Every verse read; each component's profile; ten kinds of relation between the components; 30 fringe observations	M47-inner-seat-depiction-v1
3	Spirit distinction	Each spirit use classed divine / human / other / disposition / temper / undetermined (559 rows)	M47-spirit-distinction-v1 + CSV v2
4	Co-occurrence	2,404 M47 verses carry words from 79 other clusters, grouped into eight domains	M47-other-cluster-cooccurrence-assessment-v1
5	Batches A–H	8,605 word pairs read in eight domains; from Batch F on,	M47-x-*-batch{A–H}

#	Step	What it produced	File
		interaction first and "revisit as the rule"	
6	Seat coverage	Only 10% of other-cluster verses contain a seat word; 59% have none within 3 verses	M47-seat-coverage-and-unseated-verses-v1
7	T-code question → re-allocation	Inner-being terms filed in T-codes were invisible (<i>qereb</i> "within", die, say, kidneys, bowels); 72 items re-allocated (#1880, applied)	M47-t-code-to-m-code-question-v1 , M47-reallocation-register-v2
8	No-seat pilot	M02 and M20 read for the verses with no seat word	wa-cluster-M47-noseat-pilot-index-v1 (+ M02 / M20 folders)
9	Beyond the seat	Researcher: "the concept of M47 seat is perhaps too narrow". Twelve ways an inner operation is carried; the seat is one of them (#1883)	wa-cluster-M47-ib-operation-modes-consideration-v1

The turn in the arc. Steps 1–5 asked *what the seat is and does*. Steps 6–9 found that most inner-being activity in the text is **not** stated with a seat word. The frame therefore has to hold both the seat and the wider operation it belongs to (§6).

2. The core picture: one inner person, seen from several angles

The verses do not present a set of organs with fixed jobs. They present **one inner person**, and each word brings its own angle (depiction §1, §5). Words are placed in parallel, summed, nested and translated into one another; they come apart clearly only at a few boundaries (§3).

Component	Its angle	What it characteristically does	What is done to it	Pointer
Heart (<i>lēv</i> / <i>lēvāv</i> / <i>kardia</i>)	the centre or "midst"	says within, plans, decides, stores, remembers, understands, feels, is oriented; the source of speech and deeds	tested, weighed, known by God alone; turned, hardened, filled, written on, stolen, made new	depiction §2.1
Soul (<i>nephesh</i> /	the living, needing	thirsts, longs, is bitter, waits, loves, blesses; is	hunted, delivered, ransomed,	depiction §2.2

Component	Its angle	What it characteristically does	What is done to it	Pointer
<i>psychē</i>)	self	the life and the "myself"	restored, addressed by its owner, sworn by	
Spirit (<i>rûah</i> / <i>pneuma</i>)	the moving, animating force	is troubled, revived, broken, fervent, provoked; carries temper and self-knowledge	stirred, hardened, weighed; God's Spirit comes upon, fills, dwells in it; dispositions "arrive" as spirits	depiction §2.3; spirit distinction
Flesh (<i>bāšār</i> / <i>sarx</i>)	the visible, mortal, related person	trembles, faints, sings, rots, heals in response to the inner seat; kin, "all flesh"	frail before God; in Paul, an inner orientation set against the Spirit	depiction §2.4
Conscience (<i>syneidēsis</i> , NT)	the self-judging heart	bears witness, accuses or excuses	defiled, seared, weak; purified by Christ's blood	depiction §2.5
Bosom (<i>hêq</i>)	the holding place	holds loved ones, anger and insults alike	—	depiction §2.6

The spirit words need the distinction step before any use: of 559 rows, 259 are clearly divine, 138 clearly human, 68 other beings, 23 dispositions, and 41 not determinable (spirit distinction §2–3).

3. How the components relate

Relation	What the text does	Example	Pointer
Parallel	sets two components side by side as near-equivalents	"a clean heart ... a right spirit" (Psa 51:10)	depiction §3.1
Wholeness	adds terms to name the whole person	"all your heart and all your soul" (Deu 6:5); "spirit and soul and body" (1Th 5:23)	§3.2
Unity / division	one heart, one soul, one flesh; a double heart	Psa 86:11; Psa 12:2; Gal 5:17	§3.3

Relation	What the text does	Example	Pointer
Containment	the heart as the innermost place things are put	the Spirit "in our hearts" (Gal 4:6); law, idols, eternity in the heart	§3.7
Cause and effect	inner state ↔ body, face, food, senses	"a crushed spirit dries up the bones" (Pro 17:22); bread strengthens the heart	§3.6
Opposition	flesh against Spirit (NT); frail, not hostile, in the OT	Gal 5:16–17; Isa 31:3	§3.5
Shared between persons	souls knit, hearts joined or stolen, spirit passed on	1Sa 18:1; 2Sa 15:6; 2Ki 2:9	§3.8
Parted at death	dust to earth, spirit to God, soul to Sheol or delivered	Ecc 12:7; Gen 35:18	§3.9

Distinctions are drawn sharply only at death, in Paul's flesh / Spirit contrast, in Heb 4:12 ("division of soul and of spirit"), and in 1Co 14:14 (spirit and mind in prayer) (depiction §3.4).

4. The seat across the eight domains (Batches A–H)

Each batch closed with cross-cutting observations. Read side by side, each component shows a **recurring profile** across the domains:

Domain (batch)	Heart	Soul	Spirit (human)	Flesh	Also present
Feeling (A)	the widest range of feeling; its state decides whether a feeling takes hold	bitterness, longing, weariness	troubled, crushed, faint, temper	trembles, faints, rejoices	God's Spirit gives joy, is grieved; God has the same feelings
Knowing, speaking, hearing (B)	attention ("set the heart"), knowing,	receives knowledge; dwells on memory	self-knowledge and searching	a way of knowing ("according to the flesh")	God's Spirit as source of wisdom and prophecy;

Domain (batch)	Heart	Soul	Spirit (human)	Flesh	Also present
	storing; hardness = not hearing				hearing as the main entry
Willing, desiring (C)	orientation set, held, divided, hardened	the desiring self: desire and vitality are one word	energy and disposition rather than choice	OT longs for God; NT wrong desire	other spirits act on orientation from outside
Moral condition (D)	the organ that is morally evaluated	the accountable, answerable life	evaluated on pride / humility	ritual body (OT); seat of sin (Paul)	other spirits carry the negative adjectives; inner vs outer purity; conscience
Relating to God (E)	where the relation is located and tested; prayer without voice	the self in address; the life redeemed	worships, serves, committed to God at death	"all flesh" comes to God; covenant cut in flesh	the divine Spirit relates to God on the person's behalf
Relating to others (F)	where hatred starts and is spoken	bonds: knit, malice, abhorrence	registers bonds; the manner of approach	kinship	inner states spread between people
Life, body, condition (G)	sustained by bread; strength or hardness by direction	life given and gathered; sworn by, bargained for	breath returns, revives	all living beings; valued by circumstance	components give way in sequence; each has its own verb at death
Setting, narrative (H)	the king's heart acted upon; allegiance	a life priced in law, not before God	ruled	kinship-flesh claims	setting-words turned inward: the seat as governed

(Batch §9–§14 "Cross-cutting observations" in each file.)

Read across the rows [Claude reading]: the heart is most often where things are *located, set and evaluated*; the soul is most often the self that *needs, is at stake and is addressed*; the

human spirit is most often *moved, stirred and disposed*; flesh changes value from OT to NT and by circumstance. These are tendencies from the batch summaries, not counts.

5. Threads that run across all the batches

These emerged from reading, not from a preset list. Each is a candidate strand.

#	Thread	Short statement	Where it is built up
T1	The seat is acted upon as much as it acts	God turns, stirs, hardens, fills; the king's heart, the most powerful, is shown most as acted on	H §1.1, §7.1; G §11; C §9.3
T2	Inner states as thresholds	the merry heart after eating and drinking comes just before a decisive event; food answers the death-wish	F §7; G §14.6, §16.2; H §7.6
T3	Components give way in sequence	Samson: soul vexed → heart told → strength gone → Lord gone → strength asked for	G §3.6, §14.4
T4	One word, opposite value	tender, strong / hard, entice, <i>nāṣar</i> , vengeance, fatness: the value comes from object and circumstance	F §6; G §3.3, §10; H §7.4
T5	Voices to the soul	five self-address settings (praise, lament, rest, self-indulgence, battle), plus others and God addressing souls	F §15; G §3.2; H §7.8; E §3.1
T6	The governed seat	rule, service, guarding and judgment turned inward: one rules one's spirit, keeps one's heart; the heart condemns the self	H §7.3
T7	The soul priced, sworn by, bargained for	law prices a life equally; before God nothing buys a soul back	G §4–5; H §2.2
T8	Inner states cross between persons	the fainthearted soldier melts others; spirits refreshed by friends; hearts stolen	F §14.5; depiction §3.8
T9	Hearing (and seeing) as the way in	the ear receives, the heart keeps or refuses; some revivals need sight	B §3, §9.5
T10	Spirits that arrive	jealousy, whoredom, stupor, skill, grace come upon a person as "a spirit"; other spirits enter and are cast out	depiction §2.3c; C §11.8; D §11.4

#	Thread	Short statement	Where it is built up
T11	Wind and breath as emptiness or life	striving after wind, windy words; breath as life lent by God	depiction §2.3e; D §11.9
T12	God has a heart and soul	grieved, delighted, swearing by his own soul; never shown hardening his own heart (#1890)	depiction §3.10; E §13.8

The four synthesis candidates named at the end of Batch H (T5, T2, T4, T6) are in this list.

None was started. The "heart as integrating centre" reading (depiction §5) is still **held** (ruling 1, co-occurrence assessment).

6. Where the seat stops: widening from the seat to the operation

- **The seat is the marked case.** Of 24,365 verses carrying another cluster's word, 2,404 (10%) have a seat word in the verse. Fear 11%, anger 10%, grief 16%, joy 18% (seat coverage §3). Hypothesis, not finding: naming the heart or soul may be a deliberate choice, to locate, intensify, internalise or hide a state (seat coverage §4.1).
- **Other vocabulary stands in for the seat.** *qereb* "within", bones, kidneys, bowels, nostril (anger), bile, "in himself". Several were in T-codes and invisible to cluster reading until #1880 (T-code question §1).
- **Twelve carrying methods** (operation modes §3): named seat · seat inside the word · inner place outside M47 · the operation word alone · face and body · act · speech · image · another person reads or names it · another person's seat · passage or next verse · something from outside reaches in.
- **Four directions of movement:** internal (one operation leads to another in the same person), outward (inner shows in face, act, speech), inward (outside reaches in), across persons (methods 9, 10 and 12).
- **What affects an operation:** a word, a gift, an interpreter, handing it over, a time limit, persuasion (operation modes §2).
- **What is not recorded anywhere yet:** the carrying method and the surface direction (operation modes §4). Nothing is proposed to record them.

7. The framework: a frame for adding strand detail

A proposed way to place any later detail against what M47 already holds. Each layer comes directly from §2–§6; none is new.

Layer	Question it answers	Values drawn from M47
1. Seat	Where, if anywhere, is the operation located?	heart · soul · spirit · flesh · conscience · bosom · a stand-in (within, bones, kidneys, bowels, nostril) · none
2. Operation	What is the inner being doing or undergoing?	feeling · knowing / hearing · willing / desiring · moral condition · relating to God · relating to others · living / dying · governing oneself (the eight domains)
3. Carrier	How does the text carry or show it?	the twelve methods (§6)
4. Agent	Who or what acts on the seat?	the self · God · God's Spirit · other spirits · another person · substances (bread, wine) · words · sight
5. Movement	What leads to what, and in which direction?	internal chain · outward · inward · across persons; sequences and thresholds (T2, T3)
6. Value	Does the value depend on object or circumstance?	fixed · reversed by object (T4) · by component · OT / NT shift (flesh)
7. Boundary	Where do the components come apart?	death · flesh / Spirit · soul / spirit (Heb 4:12) · spirit / mind

How a strand would use it [Claude reading]: a strand (for example T2, thresholds) is explored in its own verses; each observation notes which layers it touches; where it touches M47, it cites the batch section instead of re-reading it. The frame is a set of anchors for the web, not a grid to fill.

Fit with the capture model (#1900): the `ib_node` principle (verse · surface · strong · subgroup = association · question = stream) remains the central linkage. This frame does not change it. Capture stays per strand, with no backfill.

8. Parked focus areas and caveats

Parked focus areas (open items, per #1900 — not a queue):

- the twelve threads in §5, and the "heart as integrating centre" reading

- carrying method × interaction (#1883: M02 / M20 re-read by method was the proposed next unit before #1900)
- the inner being acting through the hands: God's-hand pass and special scan (#1893, signpost)
- the Batch A note on anger (spirit where anger rises, heart where it is kept): the researcher said it bears on Batch A "but not in the way you portrayed it" (#1888 point 2; ask first)
- bones, kidneys, bowels, *nous*, "inner being" as study words (excluded by ruling 3, 2026-09-27)

Caveats that travel with every use of this material:

- **English reading.** Batches were read in the ESV; grammar and root points are [lexical].
- **[verify] items** remain in G and H, and tag / surface misalignments are listed in depiction §6a.
- **41 spirit uses are not determinable** (spirit distinction §3).
- **Corpus gap:** `iba.db` holds 29,760 verses against about 31,100 (#1891, on hold).
- **Nothing is in the DB.** All M47 content lives in these files.

10. For the researcher

1. **Does the frame in §7 serve as the gateway you want?** In particular, are the seven layers the right anchors, or should any be dropped or merged?
2. **"Narrative."** This document is a structured overview, not prose. If you want a running narrative version of §2–§6 as well, say so and say where it should go; per #1900, prose is yours unless you instruct otherwise.
3. **First strand.** Which thread in §5 (or parked area in §8) is taken first is your choice.
